

UNC Charlotte, Drop the Bottle!

Filters Fast encourages UNC Charlotte students to give up bottled water in favor of filtered tap water by using discount code "NinerDTB," which will take 10% off of Brita pitcher filters, faucet filters, reusable glass and BPA-free plastic bottles and more.

The Responsible Alternative

Filtering your tap water costs only pennies per gallon, whereas bottled water costs more per gallon than gasoline. Speaking of gasoline, producing and transporting bottled water burns far more fossil fuels than is needed to send water to your tap.

Lower Cost, Lower Price

Not only does filtering your tap water cost the Earth less, but it costs you less, too. Save even more with a 10% discount on all of our water filtration products. Because as a college student, you shouldn't need green to be green.
