**Metrolina Landscape Company**  
Niki Smith  704-506-2977  *(Snow Removal Contractor)*

**Staff Contact Lists**

Every maintenance shop and zone is responsible for maintaining a staff contact list of essential employees to be used in an emergency.
Facilities Management
Hazardous Weather Plan

This plan describes specific areas, sequences, personnel and equipment assigned for various hazardous weather conditions such as snow, ice, hurricanes, tornadoes and flooding situations.

Hazardous Weather Events During Normal Business Hours:

FM “essential personnel” including Managers, Supervisors, and other “essential personnel” are expected to report to work during periods of hazardous weather which occur during normal business hours. “Essential personnel” are expected to report to work during normal business hours even if the local television and radio stations are announcing the University is closed due to inclement weather. Supervisors will notify “essential personnel” if they do not need to report.

Hazardous weather events outside normal business hours:

“Essential personnel” may be called in to assist the Grounds Department in clearing the campus outside of normal business hours. Call-ins may be made by the Grounds Superintendent, Facilities Operations Director, or employee's Supervisor as deemed appropriate in accordance with this plan. The volunteer list may be used for small events and alternating use of Teams A & B for larger or lengthy events requiring rotation of personnel.

Supervisors shall ensure their employees are aware of the plan and will provide assigned personnel the direction and guidance needed during inclement weather including call-in notification for after-hours events.

Supervisors will ensure that all tools and equipment used in hazardous weather conditions are signed out during use and properly returned to storage after completion of task. Appropriate personnel will be assigned to monitor radio traffic and telephone at the Facilities Management front desk.

The Facilities Operations Director is responsible for notifying the Associate Vice Chancellor for Facilities Management in the event it becomes necessary to activate this plan. The Facilities Operations Director, or the Grounds Superintendent, will be notified by Campus Police during non-business hours of campus conditions. Their assessment will be taken into consideration.

The crews may be assigned to other locations based on operational status of the University at the time a hazardous weather condition commences.

Personnel who are assigned two-way radios, pagers or telephones will carry them at all times while on duty.

Major parking lot snow clearing will be contracted. In November of each year the Facilities Operations Director or Grounds Superintendent will coordinate with Purchasing to establish an on-call contract. The contractor assigned by Purchasing will remain on standby/on-call basis during the November through March winter period.

The Facilities Operations Director/Grounds Superintendent will maintain a Campus map showing the areas and priorities described in this plan.
UNC CHARLOTTE
FACILITIES MANAGEMENT HAZARDOUS WEATHER PLAN

SNOW AND ICE REMOVAL

The campus has been divided into sectors with crews assigned to specific areas for snow removal, sanding and salting as conditions dictate. This plan may be initiated at any time as required. Employees will report to work when called. Supervisors will brief employees on this plan and will accomplish tasks assigned to their shops.

During normal working hours, the plan will be initiated by the Associate Vice Chancellor for Facilities Management, or in his absence, the Facilities Operations Director. During non-working hours, Campus Police will keep the Facilities Operations Director informed of conditions. If it becomes necessary to activate the plan and call in employees, the Facilities Operations Director, or Associate Vice Chancellor will contact each supervisor. The supervisor will report to work and call in the required employees needed to complete the task of making the roads and walkways safe. The Grounds Superintendent may activate the plan if either of the managers referenced herein cannot be contacted.

Supervisor shall check the campus event schedule in order to set priorities for the various crews. Attention should be given to events schedule at the Student Activity Center (SAC). Events scheduled at SAC will also include SAC north parking lot and the West and Cone decks.

During the first week of November, Zone/Shop Supervisors will review and update snow plan with current information and insure that all snow removal equipment is operational and in good working order. Once updates are approved and snow plan is issued, supervisors will review the plan with all assigned personnel to familiarize crews with all critical details.

A significant aspect of snow and ice removal is the proper application of ice melting material and slag to assist with melting of ice and providing traction for pedestrian/vehicular travel. Supervisors are to provide adequate training and supervision to insure these products are used sparingly and at appropriate rates to provide the most efficient utilization and reduce post storm clean up for which each snow/ice removal crew is responsible.

Assessment / Conditions of Roads & Sidewalks
The following color coded system will be used to identify conditions on campus & assist with assessing areas.

**Color Coded Status**
- Green – 100% clear and accessible.
- Yellow – Passable – but proceed with caution.
- Black – Not Passable – Emergency Personnel Only. (extreme ice conditions)

Priorities of Clean Up / Removal of Snow or Ice
The removal of snow & ice on campus is of upmost importance to avoid lost time for classes & the work force on campus. The general plan on the campus is to make all areas clear for vehicle or pedestrian traffic. There is some flexibility that is intended within the plan to address specifics depending on the timing of the occurrence – both during the day and day of the week.
If the occurrence is during the school week & the campus is closed – priorities will be given to food service areas for the student population and access pathways. As also called out on the plan – priorities will be given to safe vehicle traffic around campus.

For occurrences on weekends, priorities may vary depending on needs identified – but certainly will include food service areas identified as being open for the student population.

Parking Decks

The Parking Decks team will begin clearing decks as soon as all roads and surface parking lots are deemed safe and manageable. The Grounds Superintendent or designee will determine this and report to the communications center.

Parking deck priorities are:

1. Union Deck
2. Cone Deck
3. West Deck
4. East Deck
5. South Village Deck
6. North Deck
7. CRI Deck

The Toro brooms will assist with deck clearing as soon as they are not needed for campus sidewalks. The Communications center will assign Toro Brooms to parking decks.

Parking Services will provide an essential employee to close upper decks and help determine deck safety and status.

Grounds Staff will apply all chemicals or ice removers within the parking decks, breezeways or interior walks.

*** No other groups are approved to apply chemicals at the parking decks.

(Limited access sidewalk clearing)

To Woodward
Limited Access Sidewalk Clearing
Use of Scraper Blades and Screenings Spreaders

In extreme conditions (ice, etc..) the F&O Director or Grounds Superintendent will decide that only limited access routes will be cleared and maintained. Other routes will be cleared after these primary routes.

Grounds will clear the primary sidewalks indicated on this map, including CRI campus, or apply screenings if conditions are icy.

Sidewalk teams will clear stairs, sidewalks, and other access points from each building in their area to the major routes.
